BASICS C#: A BOOK THAT EXPLAINS THE RULES OF C # PROGRAMMING LANGUAGE WITH CLARITY AND SIMPLICITY (PAPERBACK)

Independently Published, United States, 2019. Paperback. Condition: New. Language: English. Brand new Book. if (User.Check(description)) Introduction: C # is a modern, static, profiling, functional, procedural, procedural, general and orientation oriented language (using rows). It is also subject to the principles of structural-oriented programming and comes with an extensive library and a very large number of users. It has been available in the beta since 2000 before it was officially released in February 2002 at the same time that Microsoft Core is linked to it. C # can work only with this operating environment, and is currently only available on Windows NT, 2000, and XP machines. With a platform. NET, three new languages appeared: C #, VB.VET, . C # is pretty much a "copy" of Java. and are the Visual Basic and Jscript extensions for the platform. This allows the programs in which you operate a very large set of layers, which are very similar to those within the default Java devices. As an initial approximation, we can say that the platform is a Java-like operating environment. C # has become a good choice for many types of development projects. Rapid application development projects, projects implemented by individuals, large or small teams, Internet applications, and projects with strict reliability requirements The importance of the platform is enormous, both for its breadth and for the associated technological depth. This software development platform has had a significant impact on the software industry, in particular, the productivity of programmers. By breaking the barriers of integration between different programming languages and creating new scenarios for integrating and creating professional applications, drastically changes the landscape in software engineering. The use of open industry standards allows connectivity with the different systems used and allows the DotNet platform to be the basis for companies to deliver their...
